A Single Device Solution to Enable IoT Applications DUAL INTERFACE NFC/RF + EEPROM TAGS The integration of EEPROM and NFC/RF connectivity allows data to be wirelessly written/retrieved from the device without powering the system

Semiconductor and Integrated Circuit Devices

The conference on Design of Circuits and Integrated Systems (DCIS) is an international meeting for researchers in the highly active fields of micro- and nano-electronic circuits and integrated systems.

DCIS2018 | Design of Circuits and Integrated Systems

Download this article in PDF format. When choosing the Ethernet technology that might best fit your industrial system, you first need to have some base information:

Whatâ€™s the Difference Between Ethernet Types? | Machine Design

An integrated circuit or monolithic integrated circuit (also referred to as an IC, a chip, or a microchip) is a set of electronic circuits on one small flat piece (or "chip") of semiconductor material that is normally silicon. The integration of large numbers of tiny transistors into a small chip results in circuits that are orders of magnitude smaller, cheaper, and faster than those ...

A self-replicating machine is a type of autonomous robot that is capable of reproducing itself autonomously using raw materials found in the environment, thus exhibiting self-replication in a way analogous to that found in nature. The concept of self-replicating machines has been advanced and examined by Homer Jacobsen, Edward F. Moore, Freeman Dyson, John von Neumann and in more recent times ...

Overview. LiberoÂ® SoC Design Suite offers high productivity with its comprehensive, easy-to-learn, easy-to-adopt development tools for designing with Microsemi's PolarFire, IGLOO2, SmartFusion2, RTG4, SmartFusion, IGLOO, ProASIC3 and Fusion families. Refer to the table below for a summary of Libero license types and its features. Also note that the PolarFire FPGA Family is now supported by ...
