

### **oral history guidelines for pdf**

Oral history is the collection and study of historical information about individuals, families, important events, or everyday life using audiotapes, videotapes, or transcriptions of planned interviews. These interviews are conducted with people who participated in or observed past events and whose memories and perceptions of these are to be preserved as an aural record for future generations.

Oral rehydration therapy (ORT) is a type of fluid replacement used to prevent and treat dehydration, especially that due to diarrhea. It involves drinking water with modest amounts of sugar and salts, specifically

sodium and potassium. Oral rehydration therapy can also be given by a nasogastric tube. Therapy should routinely include the use of zinc supplements.

### **Oral rehydration therapy - Wikipedia**

The oral history collection inventory is in order by call number and provides name of interviewee and interviewer, biographical information, date of interview, project (if applicable), restrictions, and materials available for each interview (i.e. transcript, time index, newspaper clippings, etc).
