Prenatal testing consists of prenatal screening and prenatal diagnosis, which are aspects of prenatal care that focus on detecting problems with the pregnancy as early as possible. These may be anatomic and physiologic problems with the health of the zygote, embryo, or fetus, either before gestation even starts (as in preimplantation genetic diagnosis) or as early in gestation as practicable.

1. Introduction. Point of care testing (POCT) refers to laboratory testing that occurs close to the patient rather than in a central laboratory. POCT is usually performed by non-laboratory trained individuals such as nurses, physicians, respiratory therapists, perfusionists, anesthesia assistants, midwives and paramedics.
