A microlens is a small lens, generally with a diameter less than a millimetre (mm) and often as small as 10 micrometres (Åµm). The small sizes of the lenses means that a simple design can give good optical quality but sometimes unwanted effects arise due to optical diffraction at the small features. A typical microlens may be a single element with one plane surface and one spherical convex ...

Projects and applicationsÅ¶. The term project describes a Django web application. The project Python package is defined primarily by a settings module, but it usually contains other things. For example, when you run django-admin startproject mysite youâ€™ll get a mysite project directory that contains a mysite Python package with settings.py, urls.py, and wsgi.py.
