Geography. Ruby Ridge is the southernmost of four ridges that extend east from the Bottleneck/Roman Nose mountain range toward the Kootenai River. Caribou Ridge lies north of it and the area between them drains into the Ruby Creek. Some local maps have identified Ruby Ridge as an extension of Caribou Ridge, but press reporting on the Weaver standoff used the federally recognized name.

As an example, if a user goes to /clients/new in your application to add a new client, Rails will create an instance of ClientsController and call its new method. Note that the empty method from the example above would work just fine because Rails will by default render the new.html.erb view unless the action says otherwise. The new method could make available to the view a @client instance ...
