Mathematical finance, also known as quantitative finance, is a field of applied mathematics, concerned with mathematical modeling of financial markets. Generally, mathematical finance will derive and extend the mathematical or numerical models without necessarily establishing a link to financial theory, taking observed market prices as input. . Mathematical consistency is required, not ...

Preface The past financial disasters have led to a great deal of emphasis on various forms of risk management such as market risk, credit risk and operational risk management.

Computational Risk Management

Quantitative marketing research is the application of quantitative research techniques to the field of marketing. It has roots in both the positivist view of the world, and the modern marketing viewpoint that marketing is an interactive process in which both the buyer and seller reach a satisfying agreement on the "four Ps" of marketing: Product, Price, Place (location) and Promotion.

Stakeholder management is relevant for achieving results in projects. It is one of the areas of knowledge in the PMBOK that establishes techniques and tools to manage the interests and affected parts (Rajablu et al., 2015). There are two schools of thought in Stakeholder Management, a prescriptive one, in which the focus is the application of methodologies of mapping, identification ...
