Shot noise or Poisson noise is a type of electronic noise which can be modeled by a Poisson process. In electronics shot noise originates from the discrete nature of electric charge. Shot noise also occurs in photon counting in optical devices, where shot noise is associated with the particle nature of light.

Quantum computing is computing using quantum-mechanical phenomena, such as superposition and entanglement. A quantum computer is a device that performs quantum computing. Such a computer is completely different from binary digital electronic computers based on transistors and capacitors. Whereas common digital computing requires that the data be encoded into binary digits (0, 1), each of which is ...

Quantum correlation is a key resource for quantum computation. It is recognized that a scalable measure for quantum correlation is important for the field of quantum information processing.

CQG is celebrating an increase in Impact Factor to 3.283, as reported in the 2017 Journal Citation Reports published by Clarivate Analytics. A huge thank you to all of our authors, reviewers and Board Members who have helped CQG achieve this increase. Visit our Highlights of 2017 to see the some of ...
