OXFORD MASTER SERIES IN PHYSICS ... Quantum optics is a subject that has come to the fore over the last 10–20 years. Formerly, it was regarded as a highly specialized discipline, accessible to graduate students in their final semester, and aims to introduce them to a number of current research topics. I set about designing a course to

Welcome to the webpages of the Ultrafast Quantum Optics Group at the University of Oxford. Our research concerns the application of ultrafast optics to study quantum phenomena in light and in matter, and at the interface between them. Coherence among multi-particle states in quantum systems provides some of the richest phenomenology in physics.

Theoretical quantum optics is nowadays somewhat similar to astrophysics in its interdisciplinary character: it must combine knowledge of classical and quantum electrodynamics, optics and field theory, statistical physics, quantum mechanics, plasma physics, atomic and molecular physics and so forth.

Quantum Optics - | Matthias Pospiech

Quantum optics: an introduction aims to introduce a wide range of topics at a lower level suitable for advanced undergraduate and masters level students in physics. The text is divided into four main parts, covering modern topics in both pure and applied quantum optics: I Introduction and background material. II. Photons.
